**Speedometer**

**KLF220, 300B/C:**

The speedometer shows the speed of the vehicle. In the speedometer face is the odometer. The odometer shows the total distance that the vehicle has been ridden.

**CAUTION**

The vehicle must be stopped when shifting from one range to another.
KLF400:

The speedometer shows the speed of the vehicle. In the speedometer face are the odometer, trip meter, and coolant temperature warning light. The odometer shows the total distance that the vehicle has been ridden. The trip meter shows the distance traveled since it was last reset to zero. The trip meter can be reset to zero by turning the reset knob counterclockwise. Refer to the Indicator/Warning Lights section.

A. Speedometer
B. Odometer
C. Trip Meter
D. Coolant Temperature Warning Light
E. Trip Reset Knob

Throttle Lever

The throttle lever is located on the right side of the handlebar. Pushing the lever forward increases engine speed. When released, spring pressure returns the lever to the rear. Always check that the throttle lever returns normally before starting the engine. In addition, there must be adequate throttle cable play. Refer to the MAINTENANCE AND ADJUSTMENT chapter for the throttle cable adjustment procedure.
