**Fuel Gauge**

The fuel gauge on the fuel tank shows the amount of fuel in the fuel tank.

When the red indicator needle comes near the E(empty) mark, refuel at the earliest opportunity.

**Hour Meter**

The hour meter shows the total hours that the vehicle has been operated. This meter cannot be reset.

**NOTE**

- The data is maintained even if the battery is disconnected.
- When the figures come to 99999, they turn back to 00000 and start counting upward again when the ignition switch is turned on or while the vehicle is operated.
