Fuel Gauge

The fuel gauge on the fuel tank shows the amount of fuel in the fuel tank.

When the red indicator needle comes near the E (empty) mark, refuel at the earliest opportunity.

Hour Meter

The hour meter shows the total hours that the vehicle has been operated. This meter cannot be reset.

NOTE

- The data is maintained even if the battery is disconnected.
- When the figures come to 99999, they turn back to 00000 and start counting upward again when the ignition switch is turned on or while the vehicle is operated.
