LOADING INFORMATION

**WARNING**

Incorrect loading, improper installation or use of accessories, or modification of your vehicle may result in an unsafe operating condition. Before you operate it make sure that the vehicle is not overloaded and that you have followed these instructions.

With the exception of genuine Kawasaki Parts and Accessories, Kawasaki has no control over the design or application of accessories. In some cases, improper installation or use of accessories, or vehicle modifications, will void the vehicle warranty. In selecting and using accessories, and in loading the vehicle, you are personally responsible for your own safety and the safety of other persons involved.

**NOTE**

Kawasaki Parts and Accessories have been specially designed for use on Kawasaki vehicles. We strongly recommend that all parts and accessories you add to your vehicle be genuine Kawasaki components.

Because any vehicle is sensitive to increases in weight and changes in weight distribution, you must take care in carrying cargo. The following general guidelines have been prepared to help you make your determinations.

- Reduce speed when carrying cargo. Braking distance is increased. Use extreme caution when climbing and descending hills, and traversing slopes. Carrying cargo and pulling a trailer can make the vehicle difficult to steer and may affect vehicle handling in an unpredictable manner.
- Do not operate this vehicle faster than 16 km/h (10 mph) when pulling a trailer.
- All cargo should be carried as low as possible to reduce the effect on the vehicle's center of gravity. Cargo weight should be equally distributed from side to side. This helps maintain stability by centralizing weight. Do not carry cargo on top of the cab frame.
- Do not carry more than 160 kg (350 lb) on the cargo bed of this vehicle.
- Cargo should be securely anchored. Make sure the cargo will not move around while the vehicle is moving. Recheck cargo security as often as possible (while the vehicle is stopped) and adjust as necessary.

**CAUTION**

The front body work and fenders are not designed to carry cargo or to support your weight. They may break.

- Always subtract trailer tongue weight from the Maximum Load capacity. Refer to the "Trailer Hitch Bracket (Option)" section in the "General Information" chapter.
Maximum Load

| Weight of operator, passenger, and cargo must not exceed: | 400 kg (880 lb) |
