Stopping the Engine
- Release the throttle pedal completely.
- Put the gear shift lever into the N(neutral) position.
- Apply the parking brake to help prevent the vehicle from rolling.
- Turn the ignition switch key to the OFF position.

Parking the Mule
- Stop the vehicle on a level surface.

CAUTION
Avoid parking on steeply inclined surfaces.

- When the engine has stopped, apply the parking brake to help prevent the vehicle from rolling.

A. Parking Brake Lever
**WARNING**

Be sure to apply the parking brake before leaving the vehicle. If the vehicle should move, it might be damaged or cause injury.

- Remove the ignition switch key to prevent unauthorized use.
- When parking inside a garage or other structure, be sure the structure is well ventilated and the vehicle is not close to any source of flame or sparks. This includes any appliance with a pilot light.

**WARNING**

Gasoline is extremely flammable and can be explosive under certain conditions.

---

**Reversing Gears**

- Release the throttle pedal, and stop the vehicle.
- When you want to operate the vehicle in reverse, stop the vehicle completely, allowing the engine to slow to idling speed, and move the gear shift lever to the R(reverse) position.

---

A. Gear Shift Lever
B. F(Forward) Position
C. N(Neutral) Position
D. R(Reverse) Position

---

**CAUTION**

Do not shift from F(forward) to R(reverse) and vice versa when the vehicle is moving or with the engine running above idling speed, or the transmission could be damaged.
