**Throttle Pedal**

The throttle pedal is the right pedal on the floor board. Push the pedal down to increase engine speed. Spring pressure returns the pedal to the rest position when released. Always check that the throttle pedal returns normally before starting the engine. In addition, there must be adequate throttle pedal play. Refer to the “Maintenance and Adjustment” chapter for the throttle pedal adjustment procedure.

**Trailer Hitch Bracket (Option)**

This vehicle can be equipped with an optional bracket for a trailer hitch. Trailer towing equipment is not supplied with this vehicle.

To avoid injury and property damage, observe the following precautions:

---

**WARNING**

Never carry a passenger in a trailer.

Never load more than 40 kg (88 lb) tongue weight on the towing bracket.

Do not operate the vehicle faster than 16 km/h (10 mph) when towing. Remember that towing a trailer increases braking distance.

Do not tow more than 410 kg (900 lb) trailer weight (trailer plus cargo weight).

Attach a trailer to the trailer hitch bracket only. Do not attach a trailer to any other location or you may lose control of the vehicle and have an accident.
