Operating Engine

BEFORE STARTING ENGINE

WORK IN VENTILATED AREA

Engine exhaust fumes can cause sickness or death. If it is necessary to run an engine in an enclosed area, remove the exhaust fumes from the area with an exhaust pipe extension.

If you do not have an exhaust pipe extension, open the doors and get outside air into the area.

1. Open hood and check engine oil and coolant levels. (See Service section.)
2. Open fuel shut-off valves. Check fuel filter and fuel/water separator bowls. (See Service section.)
3. If temperature is below 40°F (4°C), see Cold Weather Starting in this section.

STARTING ENGINE

IMPORTANT: To prevent engine damage:
• DO NOT use starting fluid to start engine.

1. LOCK both brake pedals (A) together with brake pedal latch (B).
2. Lift park brake lever (C) and push brake pedals (A) down to LOCK park brake. Remove foot from pedals. Pedals should stay down.
